

GNO STEM PRESENTS:

Understanding the Evolving STEM Landscape & the Role of Artificial Intelligence in Education

**Professional Development
For Grades 3 - 12
Teachers**

About the Workshop

This 2-day PD experience helps educators understand the evolving STEM landscape and the growing role of AI in education. Day one focuses on the “STEM Shift,” exploring future-ready skills, inquiry-based learning, engineering design, and authentic STEM integration across grade levels and content areas. Day two introduces foundational AI concepts, including machine learning, data, ethics, and responsible AI use. Educators will explore age-appropriate AI lessons, practical classroom applications, and strategies for teaching AI concepts in engaging, accessible ways for all learners.

Date & Time

- Wed, July 8 & Fri July 9, 2026
- 8:00 am - 3:30 pm

Location

- Discovery Health Sciences Academies, 3837 Loyola Ave, Kenner

Teachers Receive

- **\$200 stipend** for attendance
- Valuable STEM resources & strategies to implement AI in the classroom

Spaces are Limited. Register Now!
