

# Classroom to Career Connection

Active cost-free learning opportunities and resources for students and teachers  
virtual and in-person

Ochsner Education Outreach is committed to increasing access to STEM Learning, Career Exploration, and Clinical Care for every student.

We empower K-12 Students and teachers through hands-on STEM Education to foster a passion for innovation, cultivate the next generation of healthcare leaders, and inspire a healthier future.

Request Form**

## STEM Classroom Engagements

Provide students with hands-on STEM engagements from the Education Outreach Team that:

- Support where students are in specific units and assist their progress towards mastery of unit objectives
- Provide students with hands-on STEM and 21st century skills

## Career Chat - Virtual or In Person

To more easily connect classroom to career, Ochsner Education Outreach uses technology to mitigate challenges caused by transportation, time, and funding. It is easier than ever to connect with a healthcare professional from your classroom. This opportunity is available for students of all ages!

## Field Trips (limited experiences available per month)

A chance to observe a hospital atmosphere, understand the uses and importance of equipment, and learn about the career opportunities available within healthcare.

- Small group rotations through departments
- 1- to 4-hour visits, based on content and age group
- Accommodate classes between 6 and 32 students

## Teacher Professional Development

We offer a variety of professional development sessions for teachers and administrators in grades K-12. Complete the form to receive a list of our current offerings. We are also able to tailor sessions to meet the specific needs of your staff as needed. Please note that individual school-based sessions are limited.
